1. Product Overview

TEL99E is a PSTN intelligent home alarm system. This LED display alarm system is equipped with PSTN technologies and suitable for both home and commercial use. It uses the PSTN landline networks with intelligent alarm system. It is a choice of stability, reliability, security, and user friendliness. Features are very practical, cost-effective, completed configuration and ease of use. This LED display alarm can integrate with a lot of alarm accessories including door sensor, smoke detectors, gas detectors, emergency buttons and other accessories to build a powerful security setup. It has been widely used in homes, factories, schools, shops, convenience stores, financial and banking workplace, community centre and residential area to provide protection to valuable assets.

2. Main Functions & Features

TEL99E has the following main functions and features:

- 99 Wireless Zones with LED display
- PSTN telephone line working ways
- LED indicator Arm/Disarm/Stay arm/Alarm/Setting
- Password protection function
- 5 groups of call phone number and SMS number, 1 group of emergency phone number and SMS number
- 0-99 secs. delay alarm setting
- 0-99 secs. delay arm setting
- 0-30 mins. Siren ringing time setting
- Ringing times setting
- Stay intelligent arm
- Multi-Zones Triggered Mode (2 or more than 2 zones)
- Repeat triggered alarm function (sensor alarm after triggered twice)
- Telephone line anti-cut function
- Remote control the TEL99E stop the siren sound or start the siren sound
- Remote Monitoring/Arm/Disarm
- Reset factory setting
3. For Your Safety

Read these simple guidelines. Not following them may be dangerous or illegal.

**Proper Connection**

When connecting with other device, read carefully its manual so as to carry out correct installation. Do not connect it to other incompatible devices.

**Qualified Accessories**

Use original parts and peripheral equipments to avoid damage to TEL99E.

**Water Resistance**

TEL99E is not water resistant. Keep it dry. Install it inside the house.

**Confidential Phone Number**

For safety reason, do not tell other people the telephone number of your TEL99E without taking precautions of security settings.

5. Getting Started

This section will describe how to set up your TEL99E.

5.1 Standard Package List

TEL99E is supplied in a box which includes:

- PIR Detector
- Door Sensor
- Remote Controller
- Telephone Line
- PIR Bracket
- Adhesive Paper
- Siren
- Power Supply
- User Manual
- Main Host
- Package
- Color Box

5.3 Functional Parts

**LED screen display**
- **SF**: ARM
- **BF**: INTELLIGENT ARM
- **CF**: Disarm
- **99**: Emergency alarm
- **F1**: Telephone line disconnect
- **F3**: No add sensor
- **1-98**: Alarm zone display

**LED indicator**
- **POWER**: Power LED light, power supply working normal
- **ALARM**: Alarm LED light, alarm system alarm
- **SET**: SET LED light, the alarm system into setting status
- **PHONE**: PHONE LED light, access telephone line work normal
- **Microphone**: Personal remote monitoring

**Function keyboard**
- **ARMING**: ARMING LED light, the alarm system system into arm status
- **INTELLIGENT**: INTELLIGENT LED light, the alarm system system into intelligent status
- **DISARMING**: DISARMING LED light, the alarm system system into disarm status
- **ALARM**: ALARM LED light, the alarm system system into alarm status
- **Digital Keyboard**: Setting alarm system system function

5.4 Install accessories
Install the Door sensor
The door/window magnetic sensor includes two parts. The sensor will send the wireless signal to main unit immediately when the two parts depart more than 10-30mm.
The picture of the installation is as follows,
In some circumstances the wired & wireless Infrared Fence detector is more appropriate than magnetic sensors. i.e. veranda, picture window balcony, boundary wall.

Wireless glass break detector can also be used for window (see below)

The sensitivity is adjustable

Wireless scroll steel door magnetic sensor for scrolling steel door,

**Installation:** Please see below picture

It is triggered when the two parts are separated to 3cm - 5cm.
Install PIR motion sensor
PIR refers to passive Infra-red. A Passive Infra-red Sensor is an electronic device that detects the motion or movement of some person or animal by sensing the heat emitted from the body.

Installation:

The installation of wireless ceiling PIR sensor

Install smoke/gas detectors
a) Wireless smoke detector
This smoke detector detects smoke by a couple of infrared diodes, which is suitable for detecting the smoke in house, shop, hotel, restaurant, office building, school, bank, library and storehouse etc.

b) Wireless gas detector
The product is ceiling mounted gas detector with high stability. It is used for detecting leaking gas and suitable for the safety of residential house, villas, hotels, boarding house etc. Detecting the gas heavier than air: installation height from floor: 0.3m ~ 1.0m, semi-diameter to gas sources: < 1.5m; detecting the gas lighter than air: installation height from ceiling 0.3m ~ 1.0m, semi-diameter to gas sources: < 1.5m.
6. Operation steps by keyboard setting

Note: When setting by the keyboard, all the settings can be carried out under the undefended situation with a long ring for all the proper operations while two short sounds for wrong settings.

6.1 Open/Close password protection function, Change user’s password

**Command:** *11*
**Description:** open password protection function
**Note:**
Open this function; you need first input password before operation keyboard, the factory password is: 0000, input password: *0000*

**Command:** *10*
**Description:** close password protection function
**Note:**
Close this function; you no need input password before operation keyboard

Command: *7xxxx(4 numbers new password )xxxx(4 numbers new password )*  
**Description:** modify passwords

6.2 Adjust the volume of alarm siren

**Command:** #00#
**Description:** silent alarm, the siren no sound when the system alarm

**Command:** #01#
**Description:** the siren sound when the system alarm

6.3 Set up alarming telephone numbers

**Command:** #1xxxxxxxxxx(telephone number)#
**Description:** “1” means set the first group telephone number, you can receive SMS and call when system alarm.

**Command:** #2xxxxxxxxxx(telephone number)#
**Description:** “2” means set the second group telephone number, you can receive SMS and call when
system alarm.
Command: #3xxxxxxxxxxxx(telephone number)#
Description: “3” means set the third group telephone number, you can receive SMS and call when system alarm.
Command: #4xxxxxxxxxxxx(telephone number)#
Description: “4” means set the forth group telephone number, you can receive SMS and call when system alarm.
Command: #5xxxxxxxxxxxx(telephone number)#
Description: “5” means set the fifth group telephone number, you can receive SMS and call when system alarm.
Command: #6xxxxxxxxxxxx(telephone number)#
Description: “6” means set the sixth group telephone number, you can receive SMS and call when system alarm. This is emergency phone numbers

6.4 Delete telephone numbers
Command: #1#; Description: delete the first group telephone number.
Command: #2#; Description: delete the second group telephone number.
Command: #3#; Description: delete the third group telephone number.
Command: #4#; Description: delete the forth group telephone number.
Command: #5#; Description: delete the fifth group telephone number.
Command: #6#; Description: delete the sixth group emergency telephone number.

6.5 Set up siren sound time when system alarming
Command: #9xx(00-30minutes)#
Description: e.g: #95#, the siren will sound 5 minutes when the system alarm.

6.6 Set up alarm delay
Command: #7xx(00-99seconds)#
Description: e.g: #730#, the system will alarm after sensor is triggered 30 seconds.

6.7 Set ARMING delay
Command: *4xx(00-99seconds)*
Description: e.g: *430*, the system will auto ARMING after press ARM key 30 seconds.

6.8 Set remote telephone ringing times
Command: *6x(0-9times)*
Description: e.g: *63*, if will automatically get through after ringing 3 times, *60*, means no ringing times.

6.9 Set siren sound when using the remote control
Command: *21*
Description: The siren have reminder sound when you press remote control
Command: *20*
Description: The siren off sound when you press remote control, only have buzzer sound. on the remote control to turn on the siren sound.

6.10 Set buzzer sound on/off
Command: *99*
Description: Off the buzzer sound.
Command: *98*
Description: Open the buzzer sound.

6.11 Learning and delete detectors
Command: *0*
Description: Learning Remote controller: After you press *0* on the alarm panel keyboard, then press any button of the remote controller within 10 seconds. A long “Bi” sound means successfully.
Command: *01*
Description: Learning detectors: After you press *01* on the alarm panel keyboard, then trigger the detector within 10 seconds. A long “Bi” sound means successfully.
Command: *8xx(00-99zones number)*
Description: Learning detector to the designated zones number, e.g: *816*, means learning a detector to zone 16.
Command: *02*
Description: Delete all of the remote controllers
Command: #8996#
Description: Delete all detectors.

6.12 Set up mode of zones
Command: #8xxA#
Description: “xx” means 00-99 zones; “A” means mode of zones (0-8), 0: bypass mode, the zone will not working in anytime 1: common mode, the zone will alarm when system ARMING 2: intelligent mode, the zone will not working when system INTELLIGENT ARMING 3. Emergency mode, the zone will working in anytime, it can alarm when system DISARMING 4. Multi-Zones Triggered Mode: You must setup 2 or more than 2 zones for Multi-zones(for example, 5 th zone and 10th zone). For multi-zones triggered mode, only all the detectors you have registered for these zones you have setup for multi-zones are triggered within 30s. the alarm panel will alarm. 5. delay-alarm mode, the system not immediately alarm after set up delay alarm mode. 6. Repeat triggered mode, when the detector is triggered once, the system will not alarm immediately, only when it is triggered again within 30s after the first trigger, the system will alarm. 7. Doorbell mode, the system will “ding dong” when detector be triggered.
6.13 Inquiry alarm defense area  
Command: x(0-9)  
Description: Directly press 0~9 to inquiry the latest 10 alarm events and display alarm defense area (0 means the latest one).

6.14 Telephone line anti-cut function  
Command: *51*  
Description: the system will alarm when telephone lines disconnect or failure  
Command: *50*  
Description: the system will not detect telephone lines disconnection or fault.

7. Remote Controller (Key fob) Description  

7.1. Set up Arm  
Press "[button on the remote controller, and the LED display “SF”, means system “Armed”.

7.2 Set up Disarm  
Press “[ button on the remote controller, and the LED display “CF”, means system “Disarmed”.

7.3. Emergency Alarm  
Press “[button on the remote controller for emergency help, And the LED display “99”.  
Press“[button on the remote controller one time is silent alarm, while press “[button twice or long time the siren will sound.

7.4. Intelligent Arm  
Press “[ button on the remote controller and the LED display “bF”, means system “Intelligent Armed”.

8. Remote Control the system:  
You can use any telephone to dial the numbers of the system and it will put on automatically get through after system detecting the ring times you have been setup. When you hear the beep, input passwords (two sounds when the password is wrong, if the password input wrongly 3 times or no any operations within 20 seconds the phone will hang up automatically) and if it is correct, you can have remote control of the system, press # after accomplish all operations, then you can implement other operations and hang up telephone.  
Press “1” to monitor (Press “1” again for monitor 20 seconds more.)  
Press “2” to start the siren
Press “3” to stop the siren
Press “4” to arm
Press “5” to disarm
Press “#” to affirm and hang up
